

Carpenter

Gavan Construction Company is a residential builder specializing in meticulously crafted custom homes and high-quality renovations in the Sea to Sky corridor. Our projects are characterized by unique design, exceptional craftsmanship, and an obsessive attention to detail.

Job Overview

Based in the field on an active job site, the carpenter is responsible for designing, constructing, installing, and repairing a wide range of structures using wood and other building materials. This role requires interpreting project drawings, performing precise measurements and cuts, and assembling components to meet quality and safety standards. The Carpenter works collaboratively with the project manager and site foreman, may mentor apprentices, and ensures all work is completed efficiently and safely.

Duties and responsibilities

- Design, build, install and repair structures using a variety of materials.
- Perform layout measuring, marking and arrange materials for the project.
- Cut and shape wood and other materials using hand and power tools.
- Join materials with nails, screws, staples or adhesives.
- Complete accuracy checks of your work (and the work of others) and make adjustments as necessary.
- Work with prefabricated products as necessary.
- Read, use and work with drawings as provided by the PM.
- Follow direction as provided by the site foreman and PM.
- Maintain your own tools in good working order.
- Take on an apprentice when required, and complete his/her training as required by their schooling standards.
- Follow all safety procedures.

Skills, experience & education required

- Red seal in carpentry preferred, but not essential.
- Completion of a recognized apprenticeship.
- Strong understanding of the BC building code standards.
- A valid driver's license.
- Problem solving abilities.
- Physically fit and able to work outdoors in all-weather conditions.
- Level 1 first aid an asset, but not essential.
- Strong reading and math skills.
